Professional Summary:

As a seasoned Frontend Developer and Design Technologist with a decade of experience, I specialize in crafting dynamic and responsive user interfaces alongside advanced design prototypes for web applications.

My proficiency in ReactJS, Angular, JavaScript, and TypeScript enables me to deliver cutting-edge solutions across diverse sectors, including Finance, e-Learning, Entertainment, Job Portals, Admin Portals, and Food Kiosks.

I am adept at transforming complex requirements into seamless, intuitive user experiences, driving innovation and excellence in every piece of work.

- **Expertise in UI Development:** Proficient in building intuitive and responsive web pages using frameworks like ReactJS and Angular, along with HTML5, CSS3, and Bootstrap.
- **Design-to-Prototype Specialist:** As Design Technologist, Expert in understanding design requirements and rapidly translating them into functional prototypes in collaboration with designers and business stakeholders.
- **Strong Object-Oriented Programming Skills:** In-depth knowledge of OOP principles, with practical experience in Java, JavaScript, and PHP (CodeIgniter framework).
- **Comprehensive Technology Stack:** Hands-on experience with MySQL, Oracle, and various front-end technologies including Redux, RxJS, ReactQuery, jQuery, D3.js, and Chart.js and others.
- **Mobile Development Experience:** Practical knowledge in developing native Android and iOS applications.
- **Cloud and DevOps Proficiency:** Experienced with AWS services, including S3 storage, and adept in implementing automated CI/CD pipelines using Jenkins and GitHub Actions.
- **Architectural and Design Expertise:** Skilled in preparing technical architecture and design artifacts, along with delivering technical presentations.
- **Versatile and Adaptable:** A self-starter with strong technical, analytical, and interpersonal skills, capable of working independently and quickly adapting to new technologies and methodologies, including Agile SCRUM and Waterfall.

This blend of technical prowess and domain experience positions me to effectively contribute to and lead front-end development projects across various domains.

Technical Skills:

Languages & Frameworks: ReactJS, Angular, JavaScript, HTML5, CSS3/SCSS, Java.

Database & State-Store: Mongo DB, Oracle, MySQL, ReactQuery, Redux, RxJs.

Tools & Platforms: Apache Kafka, Apache Tomcat, Jenkins, Junit, Jest, Karma, JSON,

Applications: Incorta Reports, Merlin, Radar, JIRA, GitHub, BitBucket, GitHub Actions.

Development Tools: Postman, Atom, Visual Studio Code, Spring Tool Suite (STS), Eclipse.

Professional Experience:

Vonage (Part of Ericsson), Poland

Aug 2022 - Till Date

Project: Vonage Contact Center Admin Portal
Software Engineer (Frontend)

Aug 2022 - Till Date

The VCC Admin Portal is a comprehensive call center solution hosted on the network, eliminating the need for costly on-site equipment or complex system integrations. It offers a user-friendly web interface for easy configuration, with immediate changes reflected on the live platform. Key features include customizable call flows, computer telephony integration (CTI) applications, live supervisor monitoring, call recording, IVR collection, and extensive reporting capabilities. The portal can be used as a full contact center or for specialized applications like IVR data collection and automated questionnaires. It also includes various dashboards, such as team and real-time dashboards, providing admins with up-to-date agent information and essential calculations.

Technologies: ReactJS, Vivid, Html5, CSS3, SCSS, Jenkins, GitHub, GitHub Actions, AWS, React Query, Jest, Vonage-CLI, Redux Store, Styled components, React hook form, React Table.

Responsibilities:

- **Frontend Development:** Developed and maintained web applications using ReactJS, Vivid, HTML, SCSS, and Styled Components.
- **Micro-Frontend Implementation:** Designed and implemented micro-frontend applications for the VCC portal, ensuring seamless integration via iframes.
- **Dynamic UI Creation:** Created responsive user interfaces by integrating RESTful web services.
- **Deployment Management:** Managed deployments with Jenkins and GitHub Actions, ensuring timely and accurate releases.
- **Feature Leadership:** Led the development of key features in various micro-frontends, driving innovation and successful delivery.
- **Shared Components Library:** Created and maintained a shared components library used across multiple micro-frontends to ensure consistency and efficiency.
- **Team Collaboration:** Participated in daily stand-ups and Agile ceremonies (Sprint Planning, Grooming, Planning, Standup, and Retrospective), providing updates and collaborating on project progress.
- **Technical Leadership:** Contributed to technical user stories, estimated story points, identified risks, and mentored team members, supporting their development and project success.

frog Designs, Inc

Feb 2020 - Aug 2022

Client: Podar School, India
Project: Atom
Design Technologist II (UI)

Oct 2020 - Aug 2022

Atom is a comprehensive portal developed for Podar School in India, catering to various user roles including students, teachers, parents, and administrators. The platform ensures that students stay updated on their daily lessons, progress, and school activities, while also facilitating easy communication with teachers and tracking task completion. Atom keeps all users—parents, students, teachers, and principals—connected, enabling seamless communication and resource sharing. Additionally, the platform empowers teachers and principals to make data-driven decisions through analytics on student performance, teaching feedback, and resource usage. Atom's design incorporates a custom-built component library, utilizing CSS Grid for responsive layouts, SCSS as a CSS pre-processor, and the BEM methodology for a structured and modular design.

Technologies: ReactJS, Html5, CSS3, SCSS, BEM, ChartJS, React-calendar, React-date-picker, PWA, firebase, AWS, Java, etc.

Responsibilities:

- **UI Development:** Led UI development with hands-on programming using ReactJS, HTML, SCSS, and ChartJS.
- **Web Application Design:** Designed and built web applications, integrating RESTful web services for dynamic functionality.
- **Project Management:** Successfully managed project deliverables, participating in daily stand-ups, sprint planning, and team ceremonies (grooming, planning, retrospectives).
- **Technical Collaboration:** Contributed to creating technical user stories, estimating story points, and identifying risks and impediments.
- **Mentorship:** Provided guidance and support to co-workers to foster team development and productivity.

frog Designs, Inc

Feb 2020 - Aug 2022

Client: EY, India

May 2020 - Oct 2020

**Project: EY Mercury Portal
Design Technologist II (UI)**

The Mercury Solution Board (MSB) is a cross-functional team at EY responsible for the development, deployment, and continuous enhancement of Mercury, the firm's enterprise system for managing the financial health of client engagements from initial contact to final invoicing. The MSB ensures that Mercury effectively addresses the diverse and sometimes conflicting needs of EY's global offices and Service Lines, including Tax, Audit, Consulting, and Strategy and Transactions. Additionally, the MSB plays a pivotal role in promoting a margin-first approach across the organization, aligning the system with EY's strategic financial goals.

Technologies: SAP UI5, HTML, CSS, Java.

Responsibilities:

- **UI Development:** Led UI development with hands-on programming using SAP UI5, HTML, and CSS.
- **Web Application Design:** Designed and built web applications, integrating RESTful web services for dynamic functionality.
- **Project Management:** Successfully managed deliverables, actively participating in daily stand-ups, sprint planning, and other team ceremonies.
- **Technical Contribution:** Played a key role in creating technical user stories, estimating story points, and identifying potential risks.
- **Team Collaboration:** Contributed to grooming stories, updating tasks, and providing guidance to co-workers to ensure project success.

frog Designs, Inc

Feb 2020 - Aug 2022

Client: eShipper, Canada

Feb 2020 - May 2020

**Project: eShipper Admin Portal
Design Technologist II (UI)**

eShipper is a fully automated, cloud-based shipping solution designed for small businesses, whether local or global. It allows users to manage shipping seamlessly from anywhere—schedule pickups, track shipments, and manage carriers all from one platform. The eShipper Admin portal enables users to create, edit, and track work orders, monitor shipping processes, generate invoices, manage payments, and produce various reports using HighCharts. These reports include Account, Work Order, Carrier, Profit and Loss, Sales Center, Commission, and Affiliate reports. The portal also supports user management, including creating customers, users, and roles.

Technologies: Angular 9, RXJs, material-design, Html5, CSS3, Bootstrap, HighCharts, SCSS, Java, Spring boot, Hibernate.

Responsibilities:

- **UI Development:** Spearheaded UI development using Angular 9, HTML, SCSS, Bootstrap, Material Design, and HighCharts.
- **Web Application Design:** Designed and built web applications, integrating RESTful web services for seamless functionality.
- **Project Management:** Successfully delivered projects, actively participating in daily stand-ups, sprint planning, and other team ceremonies.
- **Technical Contribution:** Key player in creating technical user stories, estimating story points, and managing risks.
- **Team Collaboration:** Contributed to story grooming, task updates, and provided guidance to co-workers for enhanced team performance.

L&T Infotech**Jun 2018 - Feb 2020****Client: HBO****Jun 2019 - Feb 2020****Project: Smart Midas****Sr. Software Engineer (UI)**

HBO, a subsidiary of Time Warner Inc., is the world's leading pay TV service, offering HBO® and Cinemax® to around 134 million subscribers globally. Their offerings include subscription video-on-demand services like HBO On Demand® and Cinemax On Demand®, along with streaming services HBO GO®, MAX GO®, and HBO NOW®. Affiliates, which may include cable, satellite, or telephone providers, deliver these services to customers. MIDAS is the system used to manage affiliates, subscribers, deals, billing, and invoicing for all HBO services.

Technologies: Angular 7, Ng-Rx, RXJs, material-design, Html5, CSS3, Bootstrap, SCSS, Java, Spring boot, Hibernate.

Responsibilities:

- **UI Development:** Led UI development using Angular 7, HTML, SCSS, Bootstrap, and Material Design, integrating RESTful web services.
- **Application Design:** Designed and built web applications, ensuring all deliverables were met successfully.
- **Project Participation:** Actively engaged in daily stand-ups, sprint planning, and team ceremonies, including grooming, planning, and retrospectives.
- **Technical Leadership:** Contributed to creating technical user stories, estimating story points, and managing risks.
- **Team Support:** Provided guidance to co-workers, facilitating effective collaboration and project success.

Client: Apple Inc**Jan 2018 - May 2019****Project: Head Count Management System (HCM)****Sr. Software Engineer (UI)**

The Headcount Management System (HCM) is an internal portal at Apple designed for IS&T Managers to request OPEX and BHU headcount during the annual planning cycle. This application plays a key role in fiscal year headcount and budget planning, providing Apple senior management with a centralized platform for decision-making. HCM is integrated with the Human Resource Management System (Merlin), streamlining the process for the recruitment team to efficiently fulfill headcount requests. This system ensures accurate planning, smooth recruitment, and effective management of resources across the organization.

Technologies: Angular 5, JavaScript, jQuery, Html5, CSS3, Bootstrap, SCSS, Java, Spring boot, Hibernate

Responsibilities:

- **UI Development:** Developed dynamic web applications using Angular 5, HTML, SCSS, Bootstrap, and Material Design, integrating RESTful web services.
- **UX Design:** Created and implemented UX designs based on application requirements.
- **Module Programming:** Programmed application modules according to design specifications and requirements.
- **Requirements Analysis:** Analyzed high-level business requirements and prepared Functional Specification Documents (FSD).
- **Performance Optimization:** Identified opportunities for automation and performance improvement.
- **Proof of Concept:** Developed and evaluated proof-of-concepts for alternative solutions to determine the most efficient approach.
- **Support & Collaboration:** Provided ongoing support to development and QA teams throughout the SDLC.
- **Project Management:** Managed project deliverables successfully, participating in daily stand-ups, sprint planning, and team ceremonies such as grooming, planning, and retrospectives.
- **Technical Leadership:** Played a key role in creating technical user stories, estimating story points, and addressing risks and impediments.
- **Team Guidance:** Guided co-workers to ensure smooth project execution and team collaboration.

Capgemini, India

Mar 2017 - May 2018

Client: Standard Chartered Bank

May 2017 - May 2018

Project: Lead Management System (LMS)

Associate Consultant (UI)

The Lead Management System (LMS) is a web-based application developed by Standard Chartered Bank to efficiently generate and manage customer leads for various financial products, including savings accounts, current accounts, credit cards, and personal loans. The system streamlines the lead generation process, enabling bank representatives to capture and track potential customers effectively. Additionally, LMS provides valuable information about the bank's partners and end-users, facilitating informed decision-making and improving customer acquisition strategies. This tool is crucial for optimizing sales efforts and enhancing customer engagement.

Technologies: Angular 2, JavaScript, jQuery, Html5, CSS3, Bootstrap, SCSS, Java, Spring boot, Hibernate.

Responsibilities:

- **UI Development:** Led the development of web applications using Angular 4, HTML, SCSS, Bootstrap, and Material Design, integrating RESTful web services.
- **Project Execution:** Successfully managed and delivered project components, ensuring all objectives were met.
- **Team Collaboration:** Actively participated in daily stand-ups, sprint planning, and team ceremonies including grooming, planning, and retrospectives.
- **Technical Leadership:** Created and refined technical user stories, estimated story points, and identified risks and impediments.
- **Team Management:** Oversaw a team of 5 members, providing guidance and support to ensure effective project execution.
- **Mentorship:** Offered mentorship to co-workers, fostering a collaborative and productive work environment.
